When you drink alcohol, you increase the health risks of COVID-19 for yourself and others. It's important to be aware of this during the pandemic. Talk about these risks often. We all have a role to play in keeping our friends and families healthy and safe.

RISKS	ACTION STEPS
When kids see risky behavior from adults, it can lead them to their own unhealthy choices. Most teens say their parents are the main influence on their decisions about drinking alcohol.	Role model good examples for kids and young adults. Talk with young people about the risks of alcohol and COVID-19.
The most common way for young people to access alcohol is in the home. Kids who are allowed to drink at home are more likely to have problems with alcohol later in life.	Store alcohol safely and do not supply it to young people. Set clear rules around their use of alcohol.
Concerns caused by the pandemic that may lead you to think about drinking:> child care> job loss> family safety> remote work> finances> stress	Connect with family and friends to build a support system. Look for virtual support groups like those available from Alcoholics Anonymous (<u>ct-aa.org</u>) or Mental Health America (<u>mhanational.org/find-support-groups</u>).
Alcohol use can cause anxiety and depression.	Call your doctor or use telehealth services if you feel stress or anxiety.
Alcohol use can cause reduced sleep and poor work performance.	Avoid or limit alcohol use. Exercise regularly. Drink water. Get plenty of sleep.
When you drink, you're more likely to break social distancing guidelines. This puts you at risk of catching and spreading COVID-19.	Keep drinking to a minimum. Make sure to wear a mask and follow social distancing guidelines.
